INTERACTION WITH THE ROBOT

The aim of this canvas is to define how the robot interacts with the user, and what guides that interaction.
A rough draft of one of the interactions is also implemented.

Leadership

Who initiates the interaction? Who determines what happens next?

robot-led   mutual / alternate   user-led

Goal(s)

What is the robot's goal in the interaction? What defines the interaction?

task completion   mixed   exploration

Modalities

What ways do the user and robot interact in?

- [ ] voice
- [ ] sounds
- [ ] gestures
- [ ] movement
- [ ] digital visuals
- [ ] tactile
- [ ] olfactory
- [ ] facial expressions
- [ ] other _____

Interaction outline

Create an outline of one of the possible interactions with the robot. It can be for example the interaction you consider most important. What does the robot say? What does the user say? When are other modes of interaction used? When is data fetched?

ROBOT   USER

start of interaction

during interaction

end of interaction
