# FORM OF THE ROBOT

The aim of this canvas is to define the robot's outward qualities. If an existing robot is used, is its from modified somehow? Can the form be modified according to user?

Appearance

Where does the robot's appearance fall on this fourfold table?

human-shaped

machine-like | animal-shaped | lifelike

abstract

Movement

Is the robot's movement more machine-like or lifelike?

machine-like | hybrid | lifelike

Size

Is the robot's movement more machine-like or lifelike?

smaller | adult human size | larger

Draw a picture

What does the robot look like? Is it attached to something? Does it move around? Can it's appearance be modified?
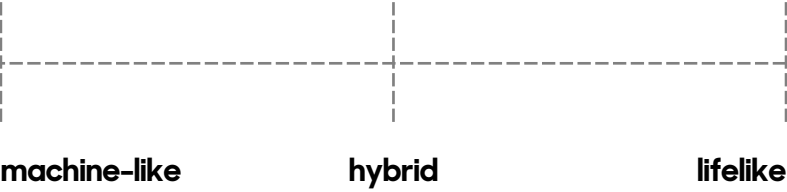

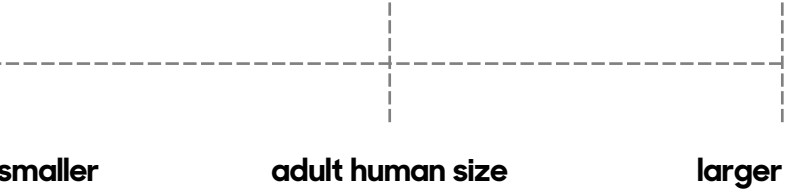

Voice

What is the robot's voice like? Does it have a gender or an age? What is the prosody like? What is its pitch and speed? Is the voice always the same?

Sounds

Does the robot make sounds: music, "beep"s, animal noises, or other things? When are these sounds heard?

Touch sensations

In close contact, it is especially imporant how the robot feels. Is it soft or rough, warm or cold?

Smell sensations

How does the robot smell? This is espeically imporant in close contact.
